

# [ V-CONNECT DAIRY FEEDER ]

## WELL-PLANNED FEED MANAGEMENT

### Digital solution for daily use

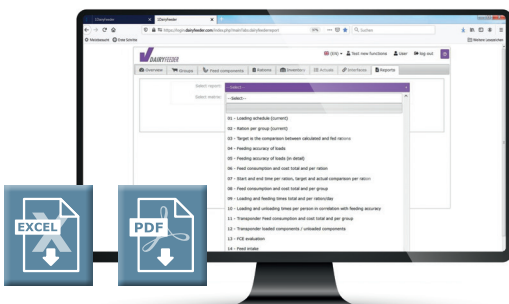

The V-CONNECT Dairy Feeder mobile feed management system is a user-friendly system that supports your daily feeding process. It can be combined with virtually any feed mixer wagon. Permanent and traceable storage of feed data in a database allows easy access anytime and anywhere.

What we offer:

- Feed component and group management, recipe formulation
- Mixing time specification
- Create premix
- Extensive reports and analyses (feed precision, times, feed costs, FCE, IOFC, inventory management, etc.)
- Very simple connection setup and switching between Bluetooth and W-LAN
- Management of rights for different users
- Interfaces to selected software
- Software updates, automatic synchronization, data storage and support
- and much more!

**SMART FEEDING**

**DATA MANAGEMENT**
